

Generation Y Student Data Text Fields

Teacher Follow-Up Survey

What opportunities do Gen Y graduates have in your school or district to continue using their technology and project skills?

District:

School: Georghe Wythe High School

I am not at liberty to comment on this at this time.

School: Warrensburg Central

Opportunity to use in course work at the High School level.

District: **Albany Diocese School District**

School: St. Clements Catholic

Gen Y graduates are used as technical assistants in the building.

District: **Ashland School District**

School: Ashland Middle School

This was our first class so we are waiting to see what develops.

District: **Bayfield School District**

School: Bayfield School

Hopefully my Gen Y students to teach share their skills with others. We have no action plan in our school district. The students staying in my school will definitely be used as peer mentors and will be available to assist the other classroom teacher.

District: **Bethel School District**

School: Spanaway Junior High School

Some are assigned to various staff members; some are tech tas

Very limited at this point. Our counselors dont have a very broad view of how to establish and monitor credit situations for students. Some have been placed with me and my wife who teaches the Gen Gitt class but that is about it.

District: Bishop Kelly

School: Bishop Kelly High School

We do not really have anything like that available for our students. We have a new principal this year, however, and I think things could change. Our GenY kids are probably going to manage the school Web site next semester.

District: Calloway County School District

School: Calloway County Middle School

Gen Y graduates become Gen Dids and are participating in the Evergreen College/Murray State University pairing STEPP project.

District: Caney Valley USD 436

School: Lincoln Memorial Elementary School

We will just have to see.

District: Cincinnati Public Schools

School: Crest Hills Elementary School

This is so new for our students, they have not advanced to that level yet, but the college partners and partner teachers have made use of their collaborative projects as part of their professional portfolios, and in turn, have caused others to be interested in future participation.

School: Hughes Center High School

At this time there is nothing in place. However, three out of four Gen-y seniors are continuing their education in technology at the college level, because of their experience in Gen-Y.

Our students now have an opportunity as seniors who were gen-y participants to do a tech internship and learn trouble shooting and networking skills. They learn video skills and produce a close circuit news program. They also are given opportunities to present at state and district conferences. Students for the first time will take over the web page development. Unfortunately none our serving on committees at the district level, because none exist.

District: Clover Park School District

School: Southgate Elementary School

Teachers and other staff at our school often make requests for technology assistance from Gen Y graduates. This assistance ranges from set up of equipment to actual planning of presentations.

District: Colville School District

School: Colville Junior High School

District: Colville School District

School: Colville Junior High School

Some are used as techs at the HS

District: Dearborn Heights Sch Dist 7

School: Pardee Elementary School

The Gen Y students were used by the media specialists to help with some of the younger students. They were also able to help troubleshoot problems in some of the classrooms.

District: Denali Boro School Distirct

School: Dublin Elementary School

Next semester I am offering an educational leadership independent study for graduates. Students will help with classroom research, technology grants, presentations.

Gen Y students gave input to the technology committee during the development of our technology plan. Gen Y students were also asked to work on collaborative projects with administration and community members.

District: Drummond Area SD

School: Drummond Elementary School

none to date

District: Dublin Unified School District

School: Wells Middle School

I do not know of any current post-gen y programs.

District: Ell-Saline Unified School District 307

School: El Saline High School

Students have used their technology skills in outside activities such as 4-H projects and helping parents in various businesses present programs. Students will have upper level technology classes to further their technology skills.

District: Ferndale School District

School: Ferndale High School

District: Ferndale School District

School: Ferndale High School

They get to do special mprojects with teachers before their junior year. Extra credits seem to be a hot item.

Special project opportunities to do Gen did work for teachers who want to further their knowlege base in technology applications.

District: Grandview School District

School: A.H. Smith Elementary School

We didn't have a gendid program this year although 5th grade classes (with former genwhy kids) did partner with 2nd grade classes and kinder to teach them different things on the computer. I also had genwhy kids help me in the computer room when working with first graders.

District: Hartford Central School District

School: Hartford Central

There is a GenDid sitting and actively participating in our technology committee. I have also witnessed on several occasions my current and past GenY students helping other students and/or teachers with software and hardware difficulties.

District: Hayward Community School District

School: Hayward Intern. School

None right now. But we are planning for future.

District: Herndon School USD 317

School: Herndon

None

District: Lake Washington Public Schools

School: Rose Hill Junior High School

Students can participate at the high school in advanced technology classes.

District: Maple School District

School: Northwestern Middle School

District: Maple School District

School: Northwestern Middle School

this is our first year so I don't know what the future holds for us. Generation Yes may be a class in our high school in the future.

District: Mellen School District

School: Mellen School

At this time many teachers are taking my students under wing to help integrate technology in their classes. Suddenly we have ideas coming form the woodwork. These kids will be busy until graduation - and beyond.

District: Milken Community Schools

School: Milken Community High School

school web management, summer technology work, community outreach, staff development assistance

District: Minerva Central

School: Minerva Central

We offer Advanced Computers, Cisco Networking and, students are always being used for troubleshooting. Our teachers are well versed in several software applications and give students many opportunities for completing projects using technology.

District: North Thurston School District

School: Meadows Elementary School

Not at the elementary level.

District: Olympia School District

School: Jefferson Middle School

Genwwy grads help with the Genwwy class, qualify to work as tech ta's, are awarded JMS tech licenses which give them special tech privileges, and take advanced mini unit classes which we occasionally offer.

School: McKinnev Elementary School

Students were the sole performers or agents of explanation in our presentation of the building plan (learning goals and assessment strategies) to our school board via a digital video project.

School: Pioneer Elementary School

District: Olympia School District

School: Pioneer Elementary School

classroom newspaper became responsibility of students -- technology was more visible across the curriculum

District: Park Falls School District

School: Lincoln Jr. High School (Park Falls)

none so far. this is our first year and i'm just concentrating on getting the genY class going.

District: South Brown County 430

School: Everest Middle School

No other plans at this time.

District: USD 405 Lyons

School: Lyons Middle School

Since this was our first year, I have no projects

Since we just started this year, we have to graduates.

District: Vallivue School District

School: Vallivue High School

We have higher level computer classes like CAD, etc., which they can take if they are interested.

School: Vallivue Middle School

They can be used as mentors and a support systems for teachers in the middle and high school.

WE let our students continue to improve their skills by offering a more advanced course in the spring.

District: West Linn - Wilsonville

District: West Linn - Wilsonville

School: Boones Ferry Elementary School

Nothing that I'm aware of. We need more. I didn't do a good job of spreading the word about Gen www.Y this year.

District: Whitehall Central School District

School: Whitehall Jr/Sr. High School

Our school offers a "DOS" class where students learn some DOS. Although, I have not been part of this class, it really is a Gen did class as the students support the web master and the repair of local machine.

District: Wichita Public Schools 259

School: Heights High School

Many of my Gen Y students have become technology proctors in our school. They fix equipemnt and help the teachers with their technology problems both software and hardware.

Many of the students become technology proctors that can help teachers throughout the building.

District: Winter School District

School: Winter School

There are several advanced computer classes available to the students. They can even gain vocational credits if they are skilled enough and work hard enough. Besides the regular courses offered during the school day, the Academic Center has a grant entitled Youth Connecting Communities in which students go out into the community and learn an aspect of business in return for their technology knowledge. This is still being revised but hopefully it will be up and running soon.
