

Generation Y 2004-2005 Evaluation Data

*Prepared for **Generation YES** by the
Northwest Regional Educational Laboratory*

This report includes data from all schools, students and teachers who participated in the online survey components of the Generation Y program during the 2004-2005 school year.

Generation Y Evaluation Results

This report includes data from Generation Y classes that were held across the United States during the 2004-2005 school year. The summary was prepared by the Evaluation Program of the Northwest Regional Educational Laboratory (www.nwrel.org/evaluation) for Generation YES. The information contained in this report was collected through a variety of online surveys and forms provided on the Generation Y website, and includes the following:

- Pre- and post-surveys completed by participating Gen Y students,
- Titles of collaborative projects undertaken by Gen Y students and their partner-teachers,
- Surveys completed by Gen Y partner-teachers at the end of the each class, and
- Note: Surveys completed by Gen Y teachers at the end of each class are normally included in this report. These surveys were not available for 2004-2005 because of a problem with a new database system; they will be back next year.

The purpose of Generation Y is to assist with the effective integration of technology in teaching and learning, while engaging students in constructive, meaningful activities that support teachers and other members of the school community. The information presented here will hopefully provide you with a snapshot of those activities, as well as an appreciation for how those activities support technology integration and student engagement in schools across the country.

Additional reports summarizing data on Generation Y classes in particular localities are also available. By comparing national data to the information from your area, you may be able to notice differences, strengths, or weaknesses in your local schools that are of interest. In addition, you may want to pursue a more in-depth review of the particular curriculum projects developed by Generation Y students, teachers, and partner teachers in your area. Many of these projects support new curriculum and instruction efforts or other initiatives in your local schools and communities.

Overview of Generation Y

The core of Generation Y is the establishment of collaborative partnerships between students and teachers, with the express purpose of facilitating the integration of modern digital technologies in the practice of teaching. Gen Y promotes the effective use of educational technology in schools, provides opportunities for meaningful student engagement and leadership, and fosters the establishment of a true learning community by blurring the distinctions between teachers and learners. Rather than teaching technology skills to teachers in the hope that they will use those skills to improve their teaching, Generation Y trains students to form working partnerships with their teachers in order to positively impact teaching, learning, and school culture. Students become agents of change, assuming responsibility for helping to improve the availability and use of customized educational resources.

Generation Y students learn technology skills with an emphasis on applying those skills to a real-world problem: helping teachers use technology to deliver more engaging and effective lessons. Students and their partner-teachers learn how telecommunications tools, the World Wide Web, digital media, presentation tools, global positioning systems, and other emerging technologies can enhance lessons and curriculum units. Gen Y students have the additional opportunity, through working with their partner-teachers, to develop an appreciation of sound pedagogical practice, including: (a) the

identification of learning objectives; (b) the consideration of assessment strategies; and (c) the alignment of projects with state or local curriculum standards.

Gen Y students are paired, either individually or in teams, with a partner-teacher or other school staff member. Initial team meetings are held to decide upon a lesson, curriculum unit, or other school need that might be addressed through a technology enriched, collaborative project. The Gen Y student then takes primary responsibility for the “nuts & bolts” technology components of the project, while the teacher ensures content accuracy and pedagogical appropriateness. The resulting projects are then used in the partner-teacher’s regular classroom, or in the library, administrative offices, etc. Through this model, educators receive targeted, individualized support as they improve their skills in using and integrating new instructional technologies. Students learn technology, communication, collaboration, and project management skills in an authentic, personally meaningful context. Many then go on further extend their skills through more advanced school or community service projects.

The Generation Y program was originally developed, beginning in 1996, in the Olympia (Washington) School District, funded by a five-year award from the U.S. Department of Education’s Technology Innovation Challenge Grant program. In addition, numerous state and local grants, as well as corporate sponsorships, have supported the development of the instructional model and materials, enabling the dissemination of the model to schools beyond Olympia. Currently, Gen Y classes are provided through the Generation YES organization to schools nationwide. The program provides a model that can be tailored to fit a wide range of grade levels, technology infrastructures, scheduling requirements, interests, and skill levels of participating students. In the summer of 2000, the program was awarded a rare “Exemplary” rating by the department’s Expert Panel on Educational Technology, a distinction limited to only two of 134 evaluated programs.

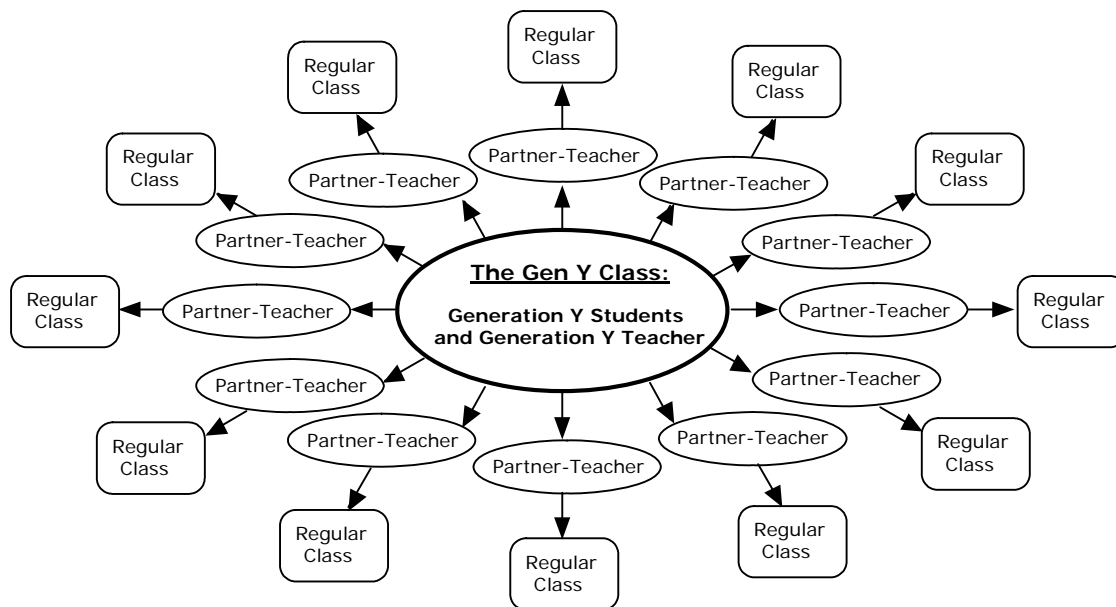

Data from the nationwide project indicate that Generation Y can be an effective alternative for schools wishing to further integrate technology into their regular curriculum offerings while increasing their use of project-based, student-centered learning practices. The model provides individualized support for educators seeking to increase their integration of instructional technologies without becoming sidetracked from their primary professional responsibilities—building and delivering effective curriculum lessons and units. Gen Y achieves this by providing students with the skills and opportunity to act as responsible partners with their teachers in creating new curriculum materials and developing new teaching and learning practices.

Participating teachers and students have consistently reported that their involvement in Generation Y afforded them an excellent opportunity to improve their basic technology skills while developing more advanced abilities to integrate technology into standards-based lessons, projects, and curriculum units. Both teachers and students report that they have gained valuable experience developing their skills in technology use, collaboration, project management, and information literacy, while contributing to the improvement of their schools. Most have found the Gen Y approach to be an effective professional development strategy for teachers, as well as an effective means to increased student engagement, learning, and leadership.

For those unfamiliar with Generation Y, the term “partner-teacher” refers to classroom teachers who are paired with a Gen Y student. These teams then collaborate in the development and delivery of a lesson or unit, incorporating modern digital technology, to the partner-teacher’s class(es). The term “Generation

Y teacher” refers to the individual who delivers and manages the Gen Y class, working with *all* Gen Y students in a school. The Gen Y teacher guides student acquisition of new skills and knowledge through the course activities, and provides supportive assistance as students develop their collaborative projects. The Gen Y teacher also helps facilitate and support the relationships between Gen Y students and their partner-teachers. The core of the model is the Gen Y class and the collaborative projects developed by Gen Y students and their partner-teachers for delivery to students in the partner-teacher’s class, as depicted in Figure 1.

Figure 1. The Generation Y Class

Generation YES provides fully participating schools with the following:

- A training workshop for the Generation Y teacher(s) and selected students
- Course materials, including curriculum guides, student resources, videos, CDs, etc.
- Access to online resources and consultants for the development of student projects
- Access to the searchable database of previous student projects
- Data collection and reporting services to monitor program outcomes

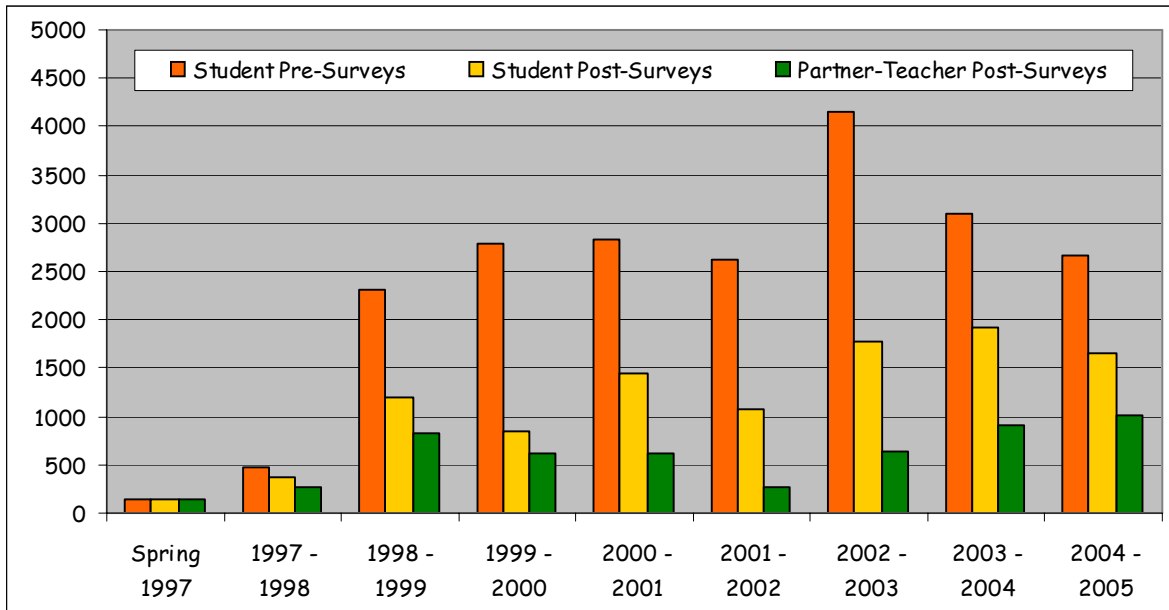

The program includes a series of online surveys and online project documentation facilities for Generation Y teachers, Generation Y students, and the Partner Teachers who work with the Generation Y students. Data from these sources, collected during the 2004-2005 school year, are presented in the tables on the following pages.

Longitudinal Trends in Generation Y Participation

The Generation Y project has produced a model for the infusion of computing and telecommunications technology into schools. The curriculum materials and online resources can be used from elementary through 12th grade, and can be adapted for use with a wide range of hardware and software resources, as well as a wide range of student and teacher interests, ability levels, and special needs.

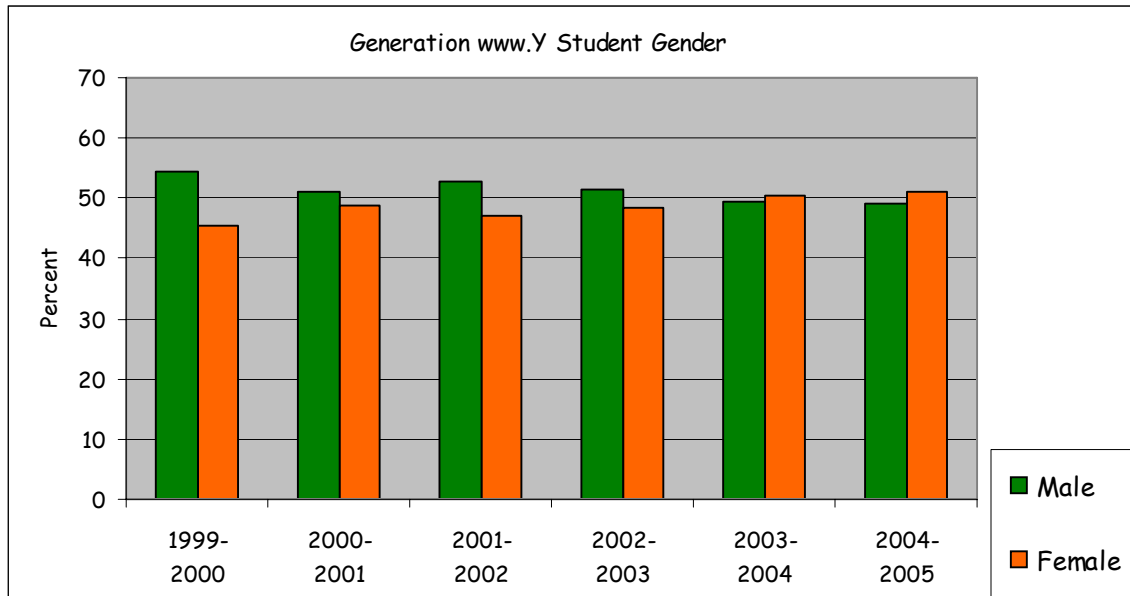

This section provides demographic information about participants who completed their Generation Y surveys over the past several years. Although the model is often implemented so that each Generation Y student is paired with a single partner teacher, some partner teachers elect to work with more than one Generation Y student. In addition, some Generation Y students work with administrators, school staff, or district staff. The number of partner-teachers is thus lower than the number of Generation Y students. Also, these numbers reflect only those students, Generation Y teachers, and partner teachers who chose to participate in the online surveying system. Since 2001, all students and partner teachers who fully participated in the online components of Generation Y also participated in the integrated system of surveys and project documentation. Figure 2 displays the number of surveys returned over the past eight years of the program.

Figure 2. Students and Partner Teachers Who Responded to Project Surveys, 1997 – 2005

Many schools make a concerted effort to insure that girls are not under-represented in Generation Y classes. This is reflected in the nearly equal numbers of boys and girls in the program, shown in Figure 3.

Figure 3. Gender of Generation Y Students, 1999 -- 2005

The Generation Y course has been taught in elementary grades through 12th grade. Generation Y classes have been most frequently delivered in middle schools, although high school and elementary classes have become more widespread in recent years. The distribution of student grade levels among students who returned preliminary surveys is displayed in Figure 4.

Student participants in Generation Y classes closely match the ethnic profile of the general student population. Figure 5 shows Gen Y student ethnicity in comparison to the United States school population figures reported in the National Center for Educational Statistics Common Core of Data for 1998 and 2003. During early years of the project, Hispanic and African American percentages were somewhat lower than the national averages, and Asian and Native American percentages somewhat higher than the national averages, as would be expected for a sample weighted toward the Pacific Northwest. The distribution has shifted somewhat closer to the national student population distribution as the program has become popular nationwide.

Figure 4. Grade Level of Generation Y Students, 1999 – 2005

Figure 5. Ethnicity of Generation Y Students, 1999 – 2005

Summary of Findings

During the past four years, Generation Y staff have made the transition from operating a grant-funded project administered through a local school district to operating a private organization providing services to schools and districts nationwide. During this transition, the survey data from Gen Y teachers, students and partner-teachers indicate that the high quality of these products and services has been not just maintained but further improved. Participating students and teachers continue to report high satisfaction and good results in their schools.

The data from 2004-2005 are very consistent with patterns found in prior years. Many of these findings are discussed in detail in the final evaluation report for the Generation Y Technology Innovation Challenge Grant, available on the Generation YES web site. Following are some highlights of the 2004-2005 data:

- Completion rates of student and partner teacher follow up surveys continued to improve, again reaching the highest level since the program began.
- Student and partner teacher ratings of the success and impact of the program, their experience working with each other, the curriculum resources and online tools provided by Generation YES all remained extremely positive.
- Student projects continue to be complex, in the sense that projects are likely to include multiple components (websites, presentations, coaching or instruction of teachers or other students, etc.). Students in 2004-2005 reported spending somewhat less time during their Generation Y classes on basic computer skills such as keyboarding and Internet searches.
- Compared to the previous year, participating students in 2005-2005 were somewhat less likely to have home computers and home Internet access, despite the nationwide trend toward more home access. The program continues to address the needs of many students who do not have these resources in their homes.
- The Generation Y partner teacher experience appears to be somewhat improved this year, over already high ratings from previous years. Only about 5 percent of teachers reported having some difficulty understanding their role in the program, a continuing improvement over earlier years when confusion over the scope of the partner teacher role was more common. A majority of partner teachers continue to report spending five hours or less on the collaborative projects with students, not a huge burden. However, the partner teachers continue to give high ratings to the value of these projects as professional development, and these ratings improved a bit further during 2004-2005. Teachers were more likely this year to report that their personal use of computers and their integration of technology in classroom work with students had increased as a result of participating in GenY. Similarly, they were more likely to report that GenY had increased their knowledge and comfort level with personal and professional uses of technology. An even greater percentage of teachers than in previous years, approaching 95%, plan to continue updating their lesson plans to more fully integrate educational technology.

Student Preliminary Survey Results

Students complete a preliminary survey when they register for the the Generation Y class. The survey includes demographics as well as questions about access to computers and the internet, current skill levels and prior use of digital tools. This information is summarized in the next set of tables.

Table 1
Participating Generation Y Students by Gender

Gender	Percentage of Students (of 2502 reporting)
Male	49.0
Female	51.0

Table 2
Participating Generation Y Students by Ethnicity

Ethnicity	Percentage of Students (of 2493 reporting)
Caucasian	48.0
African American	13.1
Hispanic	22.5
Asian	5.7
Pacific Islander	1.2
Native American/Native Alaskan	3.8
Other	5.8

Table 3
Computer Access at Home by Generation Y Students

At home do you have access to:	Yes	No
A computer	87.8	12.2
The Internet	78.0	22.0
Send and receive email	69.7	30.3

(percentages of approximately 2657 reporting)

Table 4
Frequency of Computer Use by Generation Y Students at Home and School

How often do you use a computer?	Almost every day	At least once a week	Once or twice a month	Once or twice a semester	Never or don't have access
At home	53.8	25.6	8.5	2.3	9.8
At school	50.1	37.1	7.0	3.7	2.1

(percentages of approximately 2508 reporting)

Table 5
Student Experience With Computer and Technology Prior to Participating in Generation Y

How much experience have you had with the following:	None	Just a little	Some	A lot
Use word processing software	13.6	17.0	29.5	39.8
Search the Internet	3.0	5.7	15.8	75.6
Send and receive email	16.3	13.9	20.1	49.8
Use PowerPoint or other presentation software	18.4	19.4	29.9	32.3
Troubleshoot basic computer problems	36.0	27.7	24.3	12.0
Use a scanner to digitize a picture	41.1	21.1	20.3	17.6
Use a digital camera	20.7	18.0	25.5	35.8
Create a web page or web site	53.5	18.3	16.9	11.3
Touch-typing at least 15 words/minute	17.1	20.0	24.2	38.7

(percentages of approximately 2502 reporting)

Table 6
Frequency of Computer Use in Classes

In the classes you took last semester/quarter, how often were computers used by you or your teachers?	Computers were never used	Computers were used once	Computers were used a few times	Computers were used about once per week	Computers were used several times per week
Math	52.5	10.5	19.3	7.3	10.3
Language Arts, Reading or English	30.9	11.1	31.4	13.4	13.2
Science	40.8	13.6	27.0	9.3	9.3
Social Studies, Geography or History	36.4	12.6	27.8	11.3	11.9

(percentages of approximately 2504 reporting)

Student Outcomes

Just before the class is over, students are prompted to complete a second online survey. Questions include how much practice students gained in various skill areas, what kind of collaborative projects were built, and how students rated their projects on several dimensions. The tables below summarize the outcomes reported by students.

Table 7
Practice Gained in Computing Skills by Generation Y Students

During your work this semester as a Generation Y student, how much practice and experience did you get:	None, I didn't do this at all	Just a little; 2 hours or less	Some; 2 to 10 hours	Quite a bit; 10 to 20 hours total	A lot; more than 20 hours total
Using a keyboard to touch-type at least 15 words/min	16.5	21.0	16.8	14.4	31.3
Using word processing software	13.7	28.0	4.0	17.2	15.7
Searching the Internet	4.9	19.5	19.9	22.7	32.9
Sending and receiving e-mail	18.5	28.4	19.6	14.5	19.0
Using PowerPoint or other presentation software	10.4	23.5	22.3	20.3	23.6
Troubleshooting basic computer problems	39.7	33.4	13.7	7.2	6.0
Using a scanner to digitize a picture	44.4	29.7	13.1	7.2	5.7
Using a digital camera	30.2	33.4	15.3	10.9	10.3
Creating a Web page or Web site	44.3	19.3	14.8	10.3	11.4

(percentages of approximately 1649 reporting)

Table 8
Types of Collaborative Projects Built By Students and Partner Teachers

Project Type	Percentage of projects that included this component:	Percentage of projects that were mainly focused on this component:
GenY student created or updated a Web page that was used by my partner teacher's class	39.1	18.2
GenY student helped other students search the Web for information on a class topic	42.0	4.7
GenY student developed an educational presentation using PowerPoint, HyperStudio, or other software	82.0	47.7
GenY student taught technology skills to a teacher	69.3	12.5
GenY student taught technology skills to other students	59.2	9.1
Other	15.3	7.8

(percentages of approximately 1347 reporting)

Table 9
Delivery of Collaborative Projects

	Only Me	Only my Partner Teacher	Both of Us Together
When the lesson was delivered to your partner-teacher's class, who taught the class that day?	22.1	26.0	51.9

(percentages of approximately 1091 reporting)

Table 10
Student Self-Assessments of Their Collaborative Projects

Mark the answer that best describes your experience in Generation Y:	Strongly Agree	Agree	Disagree	Strongly Disagree	Not sure, N/A
I completed my project.	57.1	27.5	5.5	1.4	8.4
I am proud of my project.	58.1	32.2	2.9	1.6	5.2
As a result of my project, other students learned about technology.	27.1	32.9	9.8	3.1	27.0
As a result of my project, other students learned about a subject (e.g. history, math, English, etc.)	38.3	31.9	8.3	4.2	17.3
The feedback about my project proposal I got online was helpful.	28.5	37.6	6.7	4.7	22.5
My partner-teacher's expectations of me were clear and realistic.	39.8	44.3	3.6	2.0	10.3
My partner-teacher was able to meet with me regularly.	30.7	40.3	16.6	5.1	7.3
My partner-teacher and I worked together well as a team.	40.5	40.9	6.8	2.7	9.2
Overall, Generation Y was a good experience.	61.8	27.8	3.2	2.8	4.4

(percentages of approximately 1450 reporting)

Partner-Teacher Outcomes

At the end of each Generation Y class, participating Partner Teachers are asked to complete a survey about their experiences working with a GenY student on a collaborative, curriculum-building project. Partner teachers are asked about changes in their attitudes and use of technology, the amount of time spent on their projects, and their ratings of a number of dimensions related to the new curriculum units or lesson plans. Their responses are summarized in the tables below, along with a listing of the project titles.

Table 11
Self-Assessed Change In Computer Use by GenY Partner Teachers

How has the frequency of the following changed as a result of your involvement with Generation Y?	More Frequently	Same Frequency	Less Frequently
You use computers to prepare for class, maintain class records, or do other school-related work.	42.0	57.7	0.3
You use computers for personal business, learning, or fun.	40.3	58.7	1.0
You use e-mail.	30.9	68.1	0.9
You use the World Wide Web.	40.2	59.3	0.5
Your students use computers during your classes.	47.7	51.0	1.2
Your students use computers outside of class to complete assignments for your class.	36.2	60.4	3.4

(percentages of approximately 1008 reporting)

Table 12
Self-Assessed Change In Partner Teachers' Comfort Using Technology

How has your comfort level with the following changed as a result of your involvement with Generation Y?	More comfortable	Same level of comfort	Less comfortable
Using computers	46.7	53.3	0.0
Integrating computers into the curriculum	54.4	45.2	0.4
Helping students use computers	45.9	53.7	0.4
Using e-mail	26.4	72.7	0.9
Using the World Wide Web	32.9	67.0	0.1

(percentages of approximately 1008 reporting)

Table 13
Time Spent by Partner Teachers on Collaborative Projects

	2 hrs or less	3-5 hours	5-8 hours	> 8 hours
<i>Partner Teachers:</i> How much time, in total, did you spend working with your GenY student this semester?	28.2	30.9	22.4	18.5

(percentages of approximately 1008 reporting)

Table 14
Partner Teacher Evaluations of the Generation Y Experience

Please indicate your level of agreement with each of the following:	Strongly Agree	Agree	Disagree	Strongly Disagree
My student-partner completed his or her project.	70.0	25.8	3.3	0.9
My student-partner's project was of high quality.	60.9	34.5	3.7	0.9
I will use the lesson/Web page/presentation with which my student-partner helped in the future.	60.8	33.1	4.7	1.4
I would like to continue developing or refining this project in the future.	50.6	41.7	6.4	1.3
Choosing a project was relatively easy.	47.0	46.2	6.4	0.4
My role as a partner-teacher was clear to me.	45.4	49.2	5.1	0.3
As a consequence of Generation Y, I learned more about technology.	42.3	46.2	9.7	1.9
As a consequence of Generation Y, my students learned about technology.	53.9	37.8	7.6	0.6
As a consequence of Generation Y, my students learned about some content area.	50.6	43.8	4.8	0.8
Generation Y is a good method for providing support and assistance to teachers as they integrate technology into their classes.	61.9	36.0	1.7	0.3
My experience in Generation Y this semester will change the way I teach some lessons in the future.	61.9	36.0	1.7	0.3
I would like to work with another Generation Y student in the coming year.	39.5	46.1	13.4	1.0
I will continue rebuilding my lesson plans to make more use of educational technology.	54.4	39.8	5.4	0.4

(percentages of approximately 1008 reporting)

Table 15
Partner Teacher Attitudes Toward Educational Computing

Please rate your opinions regarding the use of technology in education:	Strongly Agree	Agree	Disagree	Strongly Disagree	Due to my experience with Generation Y, I:		
					Agree more than before	Agree less than before	Haven't changed my opinion
I see definite benefits to students from integrating technology into education.	75.9	22.8	1.1	0.1	63.8	0.3	35.8
Technology facilitates positive changes in classroom teaching and learning practices.	66.5	32.6	0.7	0.1	61.2	0.9	37.8
I want to learn more about using new technologies.	65.2	33.7	1.0	0.1	65.7	1.5	32.8

(percentages of approximately 1008 reporting)
