

Generation YES

Professional Development

High-quality, high-impact technology professional development for your school or district.

1. Beyond PowerPoint - Great Computer-Based Project Ideas

Move beyond slideshows and book reports to projects that really benefit from the use of technology across the curriculum. Teachers will be inspired by the range of classroom possibilities. Learn where to find great free and low-cost resources and assessment tools. This one-day workshop will help teachers harness the high-tech world of their students and create exciting learning opportunities.

Workshop topics include:

- Web Design & Construction
- Global Collaboration Projects
- Blogging and Online Collaboration
- Digital Audio
- Digital Storytelling
- Movies & Animation

The Generation YES Way

- Project-based
- High-tech
- Classroom-focused
- Student-centered

Student participants welcome!

2. A Decision-Maker's Guide to Student Tech Support

In many schools with declining technology budgets, increasing technology support means looking to students as a solution. This workshop focuses on issues of security, best practices from schools nationwide, creating a program that works for you, and how to sustain your program for the long-term.

3. Getting Started with GenYES

Wondering where to begin with GenYES? Bring your teachers and staff together to learn about the exemplary GenYES program. Get started quickly and achieve your objectives.

- Research and evaluation overview
- Learn how GenYES provides high-quality, in-class professional development
